

RHODES UNIVERSITY

Where leaders learn

EMBARGOED

Using *in silico* Approaches to Ascertain Selective Novel Orthosteric and Allosteric Inhibitors of *Plasmodium falciparum* Prolyl-tRNA

Synthetase for the Development of Antimalarial Drugs

RABELANI RAMAHALA (23R6140)

A thesis submitted in partial fulfilment of the requirements for the degree
of

Master of Science in Bioinformatics and Computational Molecular Biology
(Coursework and Thesis)

of

Rhodes University, South Africa

Research Unit in Bioinformatics (RUBi)

Department of Biochemistry, Microbiology and Bioinformatics Faculty
of Science

Supervisor: Professor Özlem Tastan Bishop

Co-supervisor: Dr Olotu Andrew Fisayo

May 2024
